Part 1 — Overview

1. What this module does

The **Prospect Sales Funnel** (Prospect Management module) is your private CRM inside GWTrack. It helps you track people you are prospecting for **insurance sales** and **associate recruiting** — from first contact through presentation, application, and conversion.

At a high level, the module provides:

Capability	What it means for you
Private prospect records	Your leads belong to you unless you explicitly share them
Dual sales funnels	Separate pipelines for insurance prospects and recruiting prospects
Pipeline Board	Drag-and-drop Kanban view of where each prospect stands
Activity tracking	Log calls, meetings, presentations, and communications
Follow-Up Center	Never miss a scheduled follow-up or overdue task
Appointments	Schedule prospect meetings synced to your GWTrack calendar
Conversions	Turn prospects into clients, associate recruits, or inactive records
Controlled sharing	Let your CFM or sponsor collaborate without giving up ownership
Analytics & period goals	Measure funnel conversion, sources, and activity trends
AI Coach	Rule-based suggestions for stalled leads and hot opportunities
CSV import/export	Bulk load prospects and export your pipeline

This module is designed for **daily prospecting discipline** — not just storing names. Every stage move, call, and follow-up builds a complete history you can review with your mentor.

---

2. Privacy and data ownership

Prospects are private by default.

Rule	What it means
Owner-only	You see prospects you created or imported. They are assigned to your user account.
Explicit sharing	Other users see your prospects only if you share them with a defined permission level.
Active access	Shared access must be active, not revoked, and not past its expiration date.

Rule	What it means
Immediate revocation	When you revoke a share, the other person loses access right away.
No automatic leader access	Team leaders, CFMs, and agency owners do **not** automatically see your prospect details.
Platform admins	Super Admin and Admin roles may access records for platform support (agency policy may vary).

When collaborating, use **Share** on the prospect profile with the minimum permission level needed — for example, *View Only* for a quick review, or *Add Communication Logs* when your CFM is helping you follow up.

---

3. Who can access what

You need to…	Who typically can
Full CRM (dashboard, pipeline, profile, follow-ups)	Associates, members, CFMs, leaders
View prospects **shared with you**	Anyone with shared-prospect access
Share your prospects with a CFM or sponsor	Prospect owners with share permission
Import CSV leads	Members with import enabled
Export your list as CSV	Members with export enabled
Schedule prospect appointments	Members with appointment permission

If a menu item is missing or you get **403 Forbidden**, contact your agency administrator.

Technical permission names: Appendix O.

---

4. Module map — pages and URLs

Page	URL	Purpose
Prospect dashboard	`/team/prospects`	Stats, pipeline summary, prospect list, shortcuts
Add prospect	`/team/prospects/create`	Create a new prospect in your funnel
Prospect profile	`/team/prospects/records/{id}`	Full record: contact info, timeline, FNA
Edit prospect	`/team/prospects/records/{id}/edit`	Update fields and pipeline stage
Activity page	`/team/prospects/records/{id}/activity`	Focused activity/timeline view
Pipeline Board	`/team/prospects/pipeline`	Kanban funnel board

Page	URL	Purpose
Follow-Up Center	`/team/prospects/follow-ups`	All follow-up tasks
Appointment Calendar	`/team/prospects/appointments`	Schedule prospect appointments
Analytics & Goals	`/team/prospects/analytics`	Funnel charts, sources, period goals
Access Manager	`/team/prospects/access-manager`	Audit and manage sharing
Shared With Me	`/team/prospects/shared-with-me`	Prospects others shared with you
Shared By Me	`/team/prospects/shared-by-me`	Prospects you have shared
AI Coach	`/team/prospects/ai-coach`	Pipeline coaching suggestions
Import	`/team/prospects/import`	CSV import wizard
Export	`/team/prospects/export`	Download CSV export
Prospect FNA	`/team/prospects/records/{id}/fna`	FNA records linked to prospect

The prospecting journey

```
flowchart LR
    A[Add prospect] --> B[Contact & log activity]
    B --> C[Move pipeline stage]
    C --> D[Follow-up & appointments]
    D --> E[FNA / presentation]
    E --> F[Convert to client or associate]
```

Insurance path: New Lead → Contact → Discovery → Financial Review → Solution → Application → Client

Recruiting path: Prospect Added → Presentation → Registration Link → Active Associate

---

5. Recommended workflows

Daily prospecting routine (insurance)

1. Open **Follow-Up Center** — work overdue and due-today items first.
2. Check **AI Coach** for hot prospects or stalled applications.
3. Open **Pipeline Board** — move prospects forward after each meaningful contact.
4. **Log every call and meeting** the same day (from the board, profile, or quick-log).
5. Schedule **next follow-up** when logging activity.

6. Review **Period Goals** on Analytics to stay on weekly/monthly contact targets.

Weekly pipeline review (with CFM)

1. Share selected prospects with your CFM (*Add Notes* or *Full Collaboration* permission).
2. Walk through **Pipeline Board** insurance funnel — identify stuck stages.
3. Review **Funnel Conversion** chart on Analytics for drop-off points.
4. Convert ready prospects to **Client** or send **FNA links** where appropriate.
5. Revoke or update shares when the review is complete.

Recruiting a new associate

1. Create prospect with funnel type **Recruiting Prospect**.
2. Move through recruiting stages: invitation → presentation → registration link.
3. Use **Convert → Associate** to generate an invitation registration link.
4. Track **Registration Link Sent** and follow up until **Registered**.
5. After they join GWTrack, their progress continues in onboarding and licensing trackers.

Bulk lead intake (event or spreadsheet)

1. Go to **Import Prospects**.
2. Upload CSV, map columns, review duplicates.
3. Confirm import — all records are assigned to **you** only.
4. Open **Pipeline Board** and assign appropriate stages.
5. Set interest level and priority on hot leads.

Part 2 — Daily prospecting

Quick start

Goal: Log your first prospect and schedule a follow-up.

1. **Prospect Management** → **Add Prospect**
2. Enter name, funnel type (Insurance or Recruiting), source, interest level
3. Open **Pipeline Board** — drag the card to the correct stage after first contact
4. **Log Call** from the card or profile — set **next follow-up** date
5. Tomorrow: open **Follow-Up Center** and work due items first

---

6. Prospect Management dashboard

The dashboard (`/team/prospects`) is your command center.

Summary cards

Card	Meaning
My Prospects	Total active prospects you own
Hot Prospects	Prospects marked with hot interest level
Follow-Ups Due	Pending or overdue follow-up tasks
Appointments	Upcoming scheduled appointments
Shared With Me	Prospects others have shared with you
Shared By Me	Prospects you have shared with others
Conversion Rate	Your historical conversion percentage

Dashboard panels

- **Pipeline Summary** — stage counts; click **Open Board** for Kanban view.
- **Follow-Up Center** — preview of due follow-ups; click **View All**.
- **All Prospects** — searchable, filterable table (status, funnel type, stage, interest).
- **Hot Prospects** — priority leads needing attention.
- **Recently Contacted** — who you touched recently.
- **Communication Timeline** — recent activity across your pipeline.
- **Shared With Me / Shared By Me** — collaboration overview.
- **Import summary** — recent CSV import results.
- **Module Shortcuts** — quick links to every sub-module.
- **Period Goals** (compact) — weekly/monthly prospecting metrics.
- **Privacy Rules** — reminder of ownership defaults.

Use the **Add Prospect** button (top right) from any major screen to create records quickly.

---

7. Adding and editing prospects

Add Prospect (`/team/prospects/create`)

Fill in the form to place someone in your funnel:

Field group	Guidance
Funnel Type	Insurance Prospect, Recruiting Prospect, or Insurance & Recruiting
Name & contact	First/last name, preferred name, email, mobile, home/work phone
Address	Street, city, state/province, country, postal code
Pipeline Stage	Starting stage (defaults to first stage of the funnel if left blank)
Lead Source	How you met them (Warm Market, Referral, Social Media, etc.)
Interest Level	Cold, Warm, or Hot
Interest Score	Optional 1–10 rating
Priority	Low, Medium, High, or Urgent
FNA Status	Not Started, Scheduled, Completed, or Declined
Referral / Campaign	Optional tracking fields
Notes Summary	Free-text overview

Click **Create Prospect**. The record is private to you and appears on your Pipeline Board at the selected stage.

Edit Prospect

From the prospect profile, click **Edit** to update any field, change stage, adjust interest/priority, or set **Next Follow-Up** datetime.

---

8. The sales funnel explained

A **funnel** is the structured path a prospect follows from first contact to conversion. GWTrack provides two default funnels:

Funnel	Key	Used for
Insurance Funnel	`insurance`	Life insurance and financial solutions sales
Recruiting Funnel	`recruiting`	Building your team with new associates

Funnel type on each prospect

When creating a prospect, choose a **Funnel Type**:

Type	Pipeline Board view	Description
Insurance Prospect	Insurance funnel	Sales-focused pipeline
Recruiting Prospect	Recruiting funnel	Team-building pipeline

Type	Pipeline Board view	Description
Insurance & Recruiting	Insurance funnel	Dual-interest contact; appears on insurance board

Stage

Each prospect sits in exactly one **pipeline stage** at a time. Moving stages records history and may trigger **automated follow-ups** (see Stage automations).

Terminal stages

Some stages mark the end of active prospecting (e.g., **Client**, **Active Associate**, **Referral Partner**). After conversion, prospects may be archived or marked inactive.

---

9. Pipeline Board (Kanban)

Pipeline Board (`/team/prospects/pipeline`) is the visual heart of the sales funnel.

Using the board

1. Select **Funnel** — Insurance Prospect or Recruiting Prospect.
2. Each column is a **pipeline stage** with a count badge.
3. **Drag a prospect card** from one column to another to advance (or regress) their stage.
4. Click a prospect **name** to open their full profile.
5. Use **Log Call** or **Log Activity** buttons on cards without leaving the board.
6. Click **+ Add Prospect** to create a new lead.

What each card shows

- Prospect display name
- Phone icon (tap to call on mobile)
- Interest level badge (Cold / Warm / Hot)
- Priority badge (if High or Urgent)
- Follow-up due/overdue indicator

Who appears on the board

Only **your** active, non-archived prospects in the selected funnel type. Shared prospects you collaborate on appear on the owner's board, not yours (unless you own them).

Stage changes are tracked

Every drag-and-drop move records **stage history** (who changed it, when, and source = Kanban). This appears on the prospect **Timeline** tab.

---

10. Insurance funnel stages

Default insurance pipeline (left to right on the Pipeline Board):

#	Stage	Typical meaning
1	**New Lead**	Name captured; no contact yet
2	**Contact Attempted**	You tried to reach them
3	**Contact Made**	Two-way conversation established
4	**Discovery Call**	Initial needs conversation
5	**Financial Review**	FNA / fact-finding in progress
6	**Solution Presented**	Product or plan presented
7	**Application Submitted**	Application sent to carrier
8	**Underwriting**	Carrier reviewing application
9	**Policy Issued**	Policy approved and issued
10	**Client**	Terminal — became a client
11	**Referral Partner**	Terminal — ongoing referral relationship

Suggested actions by stage

Stage	Your next step
New Lead → Contact Attempted	Make first contact (call, text, DM)
Contact Made → Discovery Call	Schedule FNA or discovery meeting
Financial Review	Complete FNA; send FNA client link if self-serve
Solution Presented	Log presentation; schedule post-presentation follow-up
Application Submitted	Confirm underwriting documents (auto follow-up may be created)
Policy Issued → Client	**Convert to Client** with policy reference

---

11. Recruiting funnel stages

Default recruiting pipeline:

#	Stage	Typical meaning
1	**Prospect Added**	Recruit name in system
2	**Invitation Sent**	Initial invite to learn about the opportunity
3	**Follow-Up**	Awaiting response; nurture contact
4	**Presentation Scheduled**	BOP or opportunity meeting booked
5	**Presentation Attended**	They attended the presentation
6	**Opportunity Review**	Discussing fit and next steps
7	**Decision Pending**	They are deciding whether to join
8	**Registration Link Sent**	GWTrack invitation link sent
9	**Registered**	They completed registration
10	**Licensing Started**	Working on licensing requirements
11	**Active Associate**	Terminal — fully onboarded associate

Suggested actions by stage

Stage	Your next step
Presentation Attended	Log meeting; schedule follow-up within 48 hours (automation may apply)
Registration Link Sent	**Convert → Associate** to generate link; follow up in 5 days if not registered
Registered	Support onboarding, licensing tracker, FAP assignment
Active Associate	Celebrate conversion; transition from prospect to team member record

---

12. Prospect profile

Open any prospect from the dashboard, pipeline board, or follow-up list.

Header actions

Button	When available	Purpose
Convert	Owner	Client, associate, or inactive conversion
Share	Owner	Grant collaboration access
Send FNA Link	FNA permission + license on profile	Invite prospect to complete FNA online — see FNA integration

Button	When available	Purpose
Edit	Owner or edit permission	Update record
Activity	View access	Dedicated activity page
Back	Always	Return to dashboard

Summary cards

- **Funnel** — Insurance or Recruiting funnel name
- **Stage** — current pipeline stage
- **Interest** — level and optional score
- **Source** — lead source

Contact panel

Shows phone numbers, email, address, appointment date, follow-up date, tags, and quick actions (call, text, email).

Profile tabs

Tab	Contents
Timeline	Unified history: stage changes, activities, notes, communications
Activities	Structured activity log (calls, meetings, presentations)
Calls & Comms	Communication log with type and direction
Notes	Free-form notes (private notes visible only to you)
FNA	Linked FNA records and client invite status — see FNA integration and the FNA Management User Guide

Quick action buttons (on tabs)

- **Log Call** — opens activity modal preset to phone call
- **Log Activity** — any activity type
- **Log Communication** — call, text, email, etc.

AI Coach panel

If rules match this prospect, inline suggestions appear at the bottom of the profile with quick actions.

Conversion history

After conversions, a table shows type, date, who converted, policy/application references, and linked member accounts.

---

13. Logging activities and communications

Consistent logging keeps your funnel accurate and powers analytics, AI Coach, and goal tracking.

Log Activity (modal)

Available from profile, pipeline board, and AI Coach.

Field	Purpose
Activity Type	Phone Call, Text, Email, Zoom Meeting, In-Person Meeting, Presentation, Follow-Up, Policy Review, Recruitment Meeting, Financial Review, Referral Request
Date & Time	When it happened
Outcome	Short result (e.g., "Left voicemail", "Booked FNA")
Notes	Details
Next Action	What you will do next
Next Follow-Up	Schedules your next touchpoint

Saving updates **last contacted** on the prospect and may create a follow-up entry.

Log Communication (modal)

Similar to activity logging but tied to **communication types** (Call, Text, Email, Zoom Meeting, Presentation, No Answer, Voicemail Left, etc.) with **direction** (inbound/outbound).

Best practice

Log **every meaningful touch** the same day. If you move a stage on the Pipeline Board after a presentation, also log the presentation activity with outcome and next follow-up date.

---

14. Follow-Up Center

Follow-Up Center (`/team/prospects/follow-ups`) lists all follow-up tasks across your prospects.

Filters

Filter	Options
Status	Pending & Overdue (default), Pending, Overdue, Completed, Cancelled
Priority	Urgent, High, Medium, Low

Filter	Options
Due from / Due to	Date range

Table columns

Prospect name, follow-up type, priority, due date/time, status, notes, and actions.

Actions on open follow-ups

Action	Effect
Complete	Marks follow-up done
Snooze +1d	Pushes due date forward one day

Click the prospect name to jump to their profile and log the contact that completes the follow-up.

Follow-up sources

Follow-ups come from:

- Manual scheduling when logging activities
- **Stage automations** when you move to certain stages
- **Follow-up engine** rules (e.g., no contact in 7+ days)

---

15. Stage automations

When you move a prospect to certain stages, GWTrack can **automatically create follow-up tasks** (and sometimes My Tasks items) so critical next steps are not forgotten.

Examples (default configuration)

Trigger stage	Auto follow-up
Application Submitted (insurance)	High-priority underwriting check in 3 days
Presentation Attended (recruiting)	Post-presentation follow-up in 2 days
Registration Link Sent	Engine may flag if not completed in 5 days
Application Submitted (stalled 14+ days)	Urgent review task

Automations run when stage changes via Pipeline Board, profile edit, or any update path. They assign follow-ups to **you** as the prospect owner.

You still control completion — snooze or complete follow-ups in the Follow-Up Center as your situation evolves.

16. Appointment Calendar

Appointment Calendar (`/team/prospects/appointments`) schedules meetings with prospects.

Schedule an appointment

1. Click **+ Schedule Appointment**.
2. Select **Prospect**.
3. Choose **Appointment type** (FNA Appointment, BOP, Follow-Up Call, etc.).
4. Set **Date & time**.
5. Optionally assign a **Helper / mentor** (e.g., your CFM joins the meeting).
6. Enter **Location or meeting link** (office address or Zoom URL).
7. Add **Purpose** and **Notes**.
8. Click **Save Appointment**.

Appointments sync to your main **GWTrack Calendar** (`/calendar`).

Managing appointments

- View **Upcoming** and **Past** lists.
- Mark outcomes (completed, no-show, rescheduled) from the appointment hub.
- Click prospect name to open profile.

Use appointments for discovery calls, FNA meetings, BOP presentations, and recruiting interviews.

Part 3 — Conversion and collaboration

17. Converting prospects

When a prospect reaches a successful outcome, **Convert** records the result and updates their status.

Open **Convert** from the prospect profile header.

Convert to Associate (recruiting)

1. Select the **Associate** tab.
2. Add optional notes.
3. Click **Create Invitation**.
4. GWTrack generates a **registration invitation link** tied to your sponsor tree.
5. Copy and send the link to your prospect.

If the prospect has no email on file, the link is not restricted to a specific address — add email first when possible.

After registration, the new member flows into onboarding, CFM assignment, and licensing.

Convert to Client (insurance)

1. Select the **Client** tab.
2. Enter **Policy Reference** (required).
3. Optionally enter **Application Reference** and notes.
4. Click **Convert to Client**.

The prospect is marked as a client conversion with audit history.

Convert to Inactive

1. Select the **Inactive** tab.
2. Enter an optional reason (not interested, bad timing, do not contact).
3. Confirm.

The prospect is archived from active pipeline views but history is retained.

---

18. Sharing prospects with mentors and leaders

Share from profile

1. Click **Share** on a prospect you own.
2. Choose a **Visibility Preset**:

Preset	Shares with
Private	Removes sharing (owner only)
Shared with CFM	Your assigned Certified Field Mentor
Shared with Sponsor	Your sponsor in the hierarchy
Shared with Manager	Team leadership (per agency setup)
Shared with Team	Broader team visibility (per agency setup)
Shared with User	Search and pick a specific person

3. Select **Permission Level** (see appendix).
4. Optionally set an **Expiration date**.
5. Click **Save Sharing**.

Manage shares

- **Shared By Me** — list of active shares; **Revoke** anytime.
- **Access Manager** — audit trail of grants and revocations.
- **Shared With Me** — prospects others shared with you; open read-only or collaborative per permission.

Shared users see only what their permission level allows. They cannot convert or re-share unless explicitly permitted.

---

19. Import and export

Import (`/team/prospects/import`) — requires `import prospects`

Four-step wizard:

Step	Action
1. Upload	Select CSV file (max 2MB)
2. Map Columns	Match CSV headers to fields: first name, last name, email, phone, city, source, funnel type
3. Duplicates	Review rows matching existing email or phone; duplicates are **skipped** on import
4. Confirm	Run import; all new records belong to **you**

Imported prospects start at the default first stage of their funnel type.

Export (`/team/prospects/export`) — requires `export prospects`

Download a CSV of your prospects including ID, names, contact info, funnel type, stage, interest, source, status, and created date. Use for backup, mail merges, or external analysis.

Export never includes other users' private prospects.

Part 4 — Insights and connections

20. Analytics, goals, and team aggregates

Analytics & Goals (`/team/prospects/analytics`) measures pipeline health.

Summary metrics

Active prospects, new in last 30 days, hot count, follow-ups due, upcoming appointments, conversion rate, insurance vs recruiting pipeline counts.

Funnel Conversion chart

Select **Insurance** or **Recruiting** funnel. See prospect count per stage and **drop-off percentage** between stages. Use this to find where leads stall (e.g., many at Discovery Call but few at Application Submitted).

Lead Sources

Bar chart of prospects by acquisition source — identifies your best lead channels.

Monthly Activity

Communications, activities, and appointments over recent months.

Prospect Growth

Cumulative new prospects added over six months.

Dual Pipeline

Side-by-side insurance vs recruiting stage distribution.

Period Goals (sidebar)

Set weekly or monthly targets for prospecting metrics:

Metric	Examples
Contacts	Calls and touches
Appointments	Meetings scheduled
Presentations	BOP/FNA presentations delivered
Applications	Apps submitted
Recruits	New associates registered
New Prospects	Names added to CRM

Track progress bars; edit or delete goals on the full analytics page. Goals on the dashboard compact panel link here.

Team Aggregates (leaders only)

If you have downline visibility, a **Team Aggregates** panel shows **non-PII** totals: team prospect counts, hot prospects, follow-ups due, and average conversion rate across your scope. Individual prospect names are not shown to protect privacy.

---

21. AI Coach

AI Coach (`/team/prospects/ai-coach`) provides **read-only, rule-based recommendations** — not generative AI chat. Suggestions appear when your pipeline matches configured patterns.

Recommendation types (examples)

Situation	Suggestion
Presentation with no follow-up	Schedule follow-up; log call
Hot prospect inactive 3+ days	Prioritize contact today
No contact in 7+ days	Reach out to inactive prospect
Registration link not completed	Escalate follow-up
Application stalled 14+ days	Urgent review
Overdue follow-up	Act today

Using AI Coach

1. Open **AI Coach** from dashboard shortcuts or prospect profile panel.
2. Review items grouped by **High / Medium / Low** priority.
3. Click **Log Call**, **Schedule**, or **View Profile** to act.
4. Acting on a suggestion does not auto-dismiss it — complete the follow-up and log activity.

AI Coach **does not create follow-ups until you act** — it is a decision support layer on top of your data.

Stalled Prospects & High-Value Opportunities

Additional lists highlight registrations/applications needing escalation and hot prospects with recent engagement.

---

22. FNA integration

For insurance prospects, connect fact-finding to **FNA Management** (`/team/fna`). This section covers what you do **from the prospect side**. For the full FNA workflow — wizard steps, DIME analysis, CFM review, exports, and troubleshooting — see the **FNA Management User Guide**.

Two ways to run an FNA on a prospect

Approach	Start here	Best when
You enter the data	Prospect **FNA** tab → **+ Create FNA**, or FNA Management → **+ New FNA** with prospect linked	In-person or phone fact-finding; trainee CFM review
Prospect completes online	Prospect profile → **Send FNA Link**	Client portal self-serve before or after discovery call

Both paths link the FNA to the prospect record and update the prospect **FNA Status** field automatically when the linked FNA moves through workflow.

Send FNA Link (client portal)

Requires: FNA Management access and a **license number** on My Profile.

1. Open the prospect profile → **Send FNA Link**.
2. Enter recipient details → **Create invite link**.
3. Share the **URL and 6-digit security code** immediately (code shown once).
4. When the prospect submits, review the imported data on the linked FNA record.

Details: Client portal invites in the FNA guide.

Create an internal FNA record

URL: `/team/prospects/records/{id}/fna`

1. Open the prospect → **FNA** tab (or **Prospect FNAs** from the module map).
2. Click **+ Create FNA**.
3. Complete the nine-step wizard and DIME analysis.
4. Submit to your CFM when completeness is at least 60%.

Prospect FNA tab

The **FNA** tab on the prospect profile shows:

- Linked FNA records (reference code, status, completeness)
- Client portal invite status (pending, in progress, submitted)
- Quick link to open each record in FNA Management

FNA status field (on the prospect record)

The **FNA Status** dropdown on create/edit forms:

Value	Meaning
Not Started	No FNA activity yet (or FNA still in draft / CFM review)
Scheduled	CFM approved or client review meeting scheduled
Completed	Presented, follow-up, converted, or closed
Declined	Prospect declined FNA (set manually)

Auto-sync: When an FNA is linked, GWTrack updates this field from the FNA workflow. You can still set **Declined** manually. Before sending a link, set the field to match reality if needed.

Linked FNA status	Prospect FNA Status becomes
Draft through Revision Requested	Not Started

Linked FNA status	Prospect FNA Status becomes
Approved by CFM, Scheduled for Client Review	Scheduled
Presented, Follow-Up, Converted, Closed	Completed

Full status list: FNA status lifecycle.

Pipeline alignment

Prospect stage	FNA activity
Discovery Call	Schedule FNA or discovery meeting; consider **Send FNA Link**
Financial Review	FNA in progress — complete wizard, DIME, or review portal submission
Solution Presented	FNA approved and client review completed

Move stages when the **milestone actually happened**, not when you plan it.

Appointments and calendar

When scheduling a prospect appointment, choose **FNA Appointment** for discovery or review meetings. After CFM approval, you can also schedule from the FNA record's **Client Meeting** panel — that event appears on your calendar and prospect timeline.

Where to go next

Topic	Guide
Full FNA module (wizard, DIME, CFM, export)	FNA Management User Guide
FNA activity goals and scorecards	Goals & Performance User Guide

---

23. Connections to Goals & Performance

Prospect activity feeds your broader performance picture:

Connection	How
Period Goals	Prospect analytics goals track contacts, appointments, presentations, etc.
Goals & Performance module	KPI goals can sync prospecting metrics from CRM activity
FNA Management	Link prospects to FNAs; **Send FNA Link**; FNA status syncs to prospect field — FNA guide

Connection	How
Performance Planner	Income/recruiting funnels in Goals use the same activity language (contacts → appointments → presentations)
Rank advancement	Production and recruiting outcomes from converted prospects support rank criteria

Use **Prospect Analytics** for operational weekly tracking and **Goals & Performance** (`/goals`) for strategic targets and coaching conversations.

Part 5 — Reference

24. Key concepts

Term	Definition
Prospect	A person you are cultivating for insurance sale or recruiting
Owner	The GWTrack user who created/owns the private record
Funnel	Insurance or Recruiting pipeline template
Funnel type	Classification on each prospect (insurance, recruiting, or both)
Pipeline stage	Current step in the funnel
Terminal stage	End state (Client, Active Associate, etc.)
Interest level	Cold, Warm, or Hot — engagement temperature
Priority	Low through Urgent — your workflow priority
Activity	Structured logged action (call, meeting, presentation)
Communication	Logged touch with type and direction
Follow-up	Scheduled task with due date and priority
Conversion	Formal outcome: client, associate, or inactive
Share	Time-limited collaboration grant with permission level
Kanban	Drag-and-drop Pipeline Board interface

---

25. Tips and best practices

Pipeline discipline

- Move the stage **when the milestone actually happened**, not when you hope it will.
- Keep **hot** prospects at fewer than you can realistically contact weekly.
- Review the board every morning — stale columns signal neglect.

Logging habits

- Log calls immediately after hanging up.
- Always set **next follow-up** when the prospect asks for time to think.
- Use **presentations** and **financial review** activity types consistently for accurate analytics.

Insurance sales

- Send **FNA link** before or after discovery — FNA integration · FNA guide
- Move to **Financial Review** when fact-finding starts; move to **Solution Presented** after the FNA review meeting.
- Move to **Application Submitted** only when the app is actually with the carrier.
- Convert to **Client** with policy number for clean production tracking.

Recruiting

- Generate the **invitation link** from Convert as soon as they say yes.
- Follow up on **Registration Link Sent** within 48 hours.
- Share recruiting prospects with your CFM only when you want coaching input.

Privacy

- Do not share entire pipeline unnecessarily — share specific prospects.
- Set **expiration dates** on temporary collaboration shares.
- Revoke access when mentorship on that prospect ends.

Leaders and CFMs

- Coach from **Shared With Me** records — respect view-only limits.
- Use **team aggregates** for volume coaching, not individual prospect snooping.
- Ask associates to share specific stuck deals before pipeline reviews.

26. Troubleshooting

Prospect Management missing from menu

Cause: No prospect CRM permission.

Fix: Contact administrator for **Prospect Management** access.

Prospect disappeared from Pipeline Board

Cause: Wrong funnel filter, or prospect archived/converted/inactive.

Fix: Check Insurance vs Recruiting filter; confirm status is **Active**.

Drag-and-drop did not save

Cause: Connection issue or insufficient share permission.

Fix: Refresh and retry. Only the **owner** (or collaborators with edit rights) can move stages.

Cannot convert a prospect

Cause: Only owner can convert; role may lack invite permissions.

Fix: Confirm you own the record; check role for associate invitation creation.

Shared user cannot see my prospect

Cause: Revoked, expired, or wrong share preset.

Fix: Confirm share is active; they should check **Shared With Me**, not their own dashboard.

Import skipped many rows

Cause: Duplicates on email/phone or CSV formatting.

Fix: Review duplicate report in import step 3; max file size 2 MB.

Follow-up will not complete

Cause: Not marked complete after contact.

Fix: Click **Complete** in Follow-Up Center (or snooze if appropriate).

AI Coach shows nothing

Cause: No rules match — often a good sign.

Fix: Log more activity so rules can detect patterns; populate interest level and last contact dates.

Analytics conversion rate seems wrong

Cause: Low historical volume for new users.

Fix: Rate improves after first client or associate conversion.

Permission denied (403)

Fix: See Section 3 or Appendix O.

---

27. Appendix

A. Funnel types (prospect record)

Value	Label
`insurance`	Insurance Prospect
`recruiting`	Recruiting Prospect
`both`	Insurance & Recruiting

B. Interest levels

Cold · Warm · Hot

C. Priority levels

Low · Medium · High · Urgent

D. FNA statuses (prospect record field)

Not Started · Scheduled · Completed · Declined

When an FNA is linked, **Not Started / Scheduled / Completed** sync from FNA Management workflow. **Declined** is manual only. See Section 22 and the FNA Management User Guide.

E. Activity types

Phone Call · Text Message · Email · Zoom Meeting · In-Person Meeting · Presentation · Follow-Up · Policy Review · Recruitment Meeting · Financial Review · Referral Request

F. Conversion types

Type	Result
Associate	Invitation link; future team member
Client	Policy/application recorded

Type	Result
Inactive	Archived from active pipeline

G. Share permission levels

Level	Can do
View Only	See profile and timeline
Add Notes	Add notes
Add Communication Logs	Log communications
Schedule Follow-Ups	Create follow-up tasks
Schedule Appointments	Book appointments
Edit Limited Fields	Update selected fields
Full Collaboration	Broad collaborative access

H. Example lead sources

Warm Market · Cold Market · Social Media Lead · Event/Webinar Lead · Referral · Family · Friend · Church/Community Contact · Business Owner · Professional Contact

I. Example appointment types

FNA Appointment · Business Overview Presentation (BOP) · Follow-Up Call · Recruitment Interview · Policy Delivery · General Meeting

J. Period goal metrics

Contacts · Appointments · Presentations · Applications · Recruits · New Prospects

K. Insurance funnel stages (quick reference)

New Lead → Contact Attempted → Contact Made → Discovery Call → Financial Review → Solution Presented → Application Submitted → Underwriting → Policy Issued → Client / Referral Partner

L. Recruiting funnel stages (quick reference)

Prospect Added → Invitation Sent → Follow-Up → Presentation Scheduled → Presentation Attended → Opportunity Review → Decision Pending → Registration Link Sent → Registered → Licensing Started → Active Associate

M. CSV import columns

`first_name` , `last_name` , `email` , `phone` , `city` , `source` , `funnel_type`

N. Related GWTrack modules

Module	URL	User guide	Relationship
Goals & Performance	`/goals`	Guide	Strategic targets and activity planning
FNA Management	`/team/fna`	Guide	Financial needs analysis, client portal, CFM review
Calendar	`/calendar`	—	Appointments and events
My Tasks	`/tasks`	—	Tasks created from follow-up engine
Team / Downline	`/team`	—	Sponsorship and hierarchy for recruit conversion
Training Academy	`/training`	Guide	Prospecting and presentation courses

O. Permission reference

Permission	Allows
`manage prospects`	Full personal CRM
`view shared prospects`	Shared With Me records
`share prospects`	Grant/revoke sharing on your records
`import prospects`	CSV import wizard
`export prospects`	CSV download
`manage prospect appointments`	Appointment calendar

This guide reflects the GWTrack Prospect Sales Funnel module. Stage names, automations, and permissions may vary by agency configuration.
